With improved solar power technology, it is now possible to pump water much cheaper using solar energy rather than electricity. During three years (2017-2019), CoCoDA was working with our partners in El Salvador to retrofit two electrically powered water projects - El Roble and Aguacayo - with solar powered pumps.

In recent years, El Salvador has significantly increased its solar energy capacity, marking a pivotal shift towards cleaner and sustainable sources. According to the Directorate General of Energy, Hydrocarbons, and Mines (DGEHM), during 2023, El Salvador's photovoltaic plants generated approximately 539,067.71 MWh, constituting an impressive ...

Program Overview. MCC's \$449.6 million El Salvador Compact (2007--2012) funded the \$30 million Rural Electrification Sub-Activity, which included the \$2 million Solar Panel Component to provide solar electricity to address energy needs where electrical grid extensions were not economically viable. The Solar Panel Component was built on the theory that providing solar ...
