

How do I calculate the volume of liquid a container can hold?

Calculate the volume of liquid your container can hold by entering your dimensions in metric units (centimeters or meters) or imperial units (yards, feet or inches). Our tank volume calculator also has an option for a tank that is only partially filled. See below for four full examples showing in detail how our calculator works.

Should you store water in more than one container?

Store water in more than one container so you don't lose your entire water supply if the container becomes compromised. Some of these containers should be large,so you can store plenty of water,but others should be smaller so smaller amounts of water can be transported where they are needed.

How does a water lock work?

Think of locks as a flight of "water stairs" going up and down a hill. Water is drained from the first lock (using gravity) until the water level is even with the second one. The downstream gate is opened so the vessel can move into the lower lock,and the process may be repeated numerous times.

What is an example of a water lock?

For example, the Earth's mass pulls you down so you stay on the ground instead of flying away. lock: An enclosed chamber in a waterway with watertight gates at each end, for raising or lowering vessels from one water level to another by admitting or releasing water.

How much water do you need in a water tank?

Not too large,so the water in the tank is frequently replenished with fresh water (250 litres is quite sufficient for most homes). Made of approved materials; traditionally tanks were made of galvanised iron and these rust over time leading to bits in the water or a brown or yellowish tinge or a metallic taste.

Can I use a water storage tank if I have a tap?

Ideally you should only use a tap connected to the mains water supply for drinking,food preparation or teeth cleaning; however,if your drinking water comes from a storage tank then it will be safe to use if the tank is properly designed,correctly installed and kept in good condition. Do I have a water storage tank?
