

Who is islensk nyorka energy?

Islensk Nyorka Energy is the only company in the world to have operated a hydrogen refueling station, hydrogen ICE vehicles, FCEV as well as BEV's. No wonder why Islensk Nyorka Energy is one of the tops when it comes to Iceland renewable energy companies.

Can Iceland tap into its volcanic energy potential?

Iceland is a leader in renewable energy production, harnessing its geothermal and hydropower resources, and is now aiming to tap into its volcanic energy potential.

Does Iceland have a geothermal power plant?

Iceland has a geothermal power generation capacity of around 755 MW, making it one of the world's largest geothermal energy generators. Iceland's Hellisheidi geothermal power plant is one of the top ten largest geothermal plants in the world. It generates 303 MW of electricity and 400 MW of thermal energy.

Does Iceland have wind power?

Nevertheless, Glaciers cover 11 percent of Iceland. Therefore, season melt feeds glaciers' rivers thereby contributing to hydropower resources. Nonetheless, the country has lunatic wind power potential that stayed untapped for ages. However, in 2013, Iceland became a producer of wind energy that contributed to Iceland renewable energy percentage.

Does Iceland have a geothermal drilling mitigation fund?

To further incentivize geothermal energy utilization, the Government of Iceland established a geothermal drilling mitigation fund in the late 1960s. The fund loaned money for geothermal research and test drilling, while providing cost recovery for failed projects.

Will geothermal and hydro power make sense for energy transition in Iceland?

Just as geothermal and hydro power generation made sense for energy transition in Iceland, local conditions elsewhere will determine which renewable resources are the most efficient and how they will be best exploited. Because every country is unique, each transition will be different.
