

photovoltaic system, solar energy, solar panels, infrared imaging, image processing, computer vision, machine learning, object detection, infrared thermography I. INTRODUCTION Utility ...

A new PV panel condition monitoring and fault diagnosis technique that uses a U-Net neural network and a classifier in combination to intelligently analyse the PV panel's infrared thermal ...

This study explores the potential of using infrared solar module images for the detection of photovoltaic panel defects through deep learning, which represents a crucial step toward enhancing the efficiency and ...

defect detection with infrared thermography by separating the solar panel information from the background information, and extracting the possible feature to quantify the faults. This ...

Keywords: UAV, PV infrared image, U-Net, HSV, bright spots detection. Citation: Liu J and Ji N (2023) A bright spot detection and analysis method for infrared photovoltaic ...

In this paper, a hybrid features based support vector machine (SVM) model is proposed using infrared thermography technique for hotspots detection and classification of ...

In 2019, about two percent of the world's total electricity came from photovoltaic solar panels. In the United States, about 3.27 percent of electricity was generated by photovoltaic cells, and ...

This study explores the potential of using infrared solar module images for the detection of photovoltaic panel defects through deep learning, which represents a crucial step ...

The health condition evaluation of photovoltaic plants is considered a significant challenge for years. This paper proposed a framework for photovoltaic panels segmentation and defects ...

tion method for PV panel hot-spot detection. The PV panels are identified in the infrared images using improved YOLO v4, and the PV panels are extracted to segment the hot spots with ...

Aiming at the problem of difficult operation and maintenance of PV power plants in complex backgrounds and combined with image processing technology, a method for detecting hot ...

First, photovoltaic module images are collected by UAV equipped with infrared thermal imaging cameras. Next, the collected PV module defects are labeled. ... It can solve the problems such ...

DOI: 10.1007/978-3-030-31654-9_52 Corpus ID: 207758623; Infrared Image Segmentation for Photovoltaic

Panels Based on Res-UNet @inproceedings{Zhang2019InfraredIS, title={Infrared ...

A bright spot detection and analysis method for infrared photovoltaic panels based on image processing Jun
Liu^{1,2*} and Ning Ji² ¹Institute of Logistics Science and Engineering, Shanghai ...
