

Electric Ireland customers who own a micro-generator such as solar PV, micro-wind, micro-hydro, or renewable micro-CHP are eligible for this scheme. You must have an export grid connection, which is typically organised by the installer on installation or ...

Electric Ireland, with our official installation partner NRG Panel, delivers Solar PV installations across Ireland to the highest quality standards, ensuring a strict health and safety approach to protect you and our staff. Over 8,000 installs nationwide, SEAI ...

These regulations aim to bring Ireland into line with the EU's Solar Rooftops Initiative by making permitting procedures for installing solar on rooftops shorter and simpler. It supports a target of installing up to 380MW (approximately 1 million solar panels) of microgeneration capacity as part of Ireland's overall solar targets under the ...

The Micro-generation Support Scheme allows homes, businesses, farms and community buildings to sell any excess electricity they produce from solar panels back to the grid. If you sell excess renewable energy to the grid, you get a payment known as a ...

Electric Ireland will support customers on their low carbon journey with the Microgeneration Support Scheme as announced by the Irish Government on December 21, 2021. Microgeneration, such as solar photovoltaic (PV) panels, enables customers to generate their own renewable energy to reduce their carbon footprint as well as reduce electricity bills.

Microgeneration refers to the generation of electricity from renewable technology such as solar PV panels. This type of renewable energy generation allows domestic customers to produce their own electricity.

Whether you're considering heat pump or solar panel installation, here's all you need to know about microgeneration in Ireland and how to choose the best feed-in tariff to reduce your energy bill.
