"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

People and businesses in the Isle of Man enjoy reliable and efficient electricity supplies from Manx Utilities who source energy inputs via three independent supply chains; natural gas, liquid fuel and electricity imports. We generate electricity on Island and also procure electricity using an AC power interconnector marine cable.

The 26MW Billown Solar Farm in Malew, near Castletown, would certainly produce enough power to fulfill more than 5% of the Isle of Man's power demand, when functional in 2024. Island residents are being asked for their views on the new facility which would be improved 84 acres of farming land to the west of Malew Road (A3) and south of Douglas ...
