

What is Jamaica's energy source?

This page is part of Global Energy Monitor 's Latin America Energy Portal. Oil and natural gas continue to supply most of Jamaica's energy, supplemented by significantly smaller contributions from renewables. As of 2020, nearly 89% of electricity was still generated by fossil fuels.

Is Jamaica following the National Energy Policy 2009-2030?

Jamaica is currently following the National Energy Policy 2009-2030. Jamaica's December 2020 update to its NDC (Nationally Determined Contribution) aims to reduce greenhouse gas emissions by more than 25% relative to business as usual levels by 2030, with the majority of reductions coming from the energy sector.

Who regulates electricity in Jamaica?

MSET (Ministry of Science, Energy, and Technology) is the government institution responsible for energy. NEPA (National Environment and Planning Agency) is responsible for permitting and tracking all environmental impact assessments. OUR (Office of Utility Regulators) is responsible for regulating Jamaica's electrical sector.

How much electricity does Jamaica have?

As of 2020, Jamaica's installed electrical capacity was 1156 MW, supplied primarily by fossil fuels (83.73%), followed by wind (8.82%), solar (4.93%) and hydro power (2.52%).

What percentage of Jamaica's electricity is lost?

More than a quarter (26.5%) of Jamaica's electrical output is lost through poor transmission and distribution infrastructure. In 2018, the peak demand was 655 MW, and 97% of the population had access to electricity. In 2016, Jamaica consumed 2.847 billion kWh. Jamaica has no coal reserves and does not produce coal.

Does Jamaica produce natural gas?

Jamaica was not producing natural gas as of 2017. In 2016, Jamaica consumed 54,000 barrels of oil per day. In 2017, Jamaica consumed 6,961 million cubic feet of natural gas.

With a clear vision and a strategic plan, Jamaica can build a modern, resilient energy system that not only meets its current needs but also positions the country as a leader in green energy in the Caribbean. By ...

In 2020, Jamaica generated 4767 GWh of electricity; fossil fuels were the main energy source (88.67%), supplemented by smaller contributions from wind (5.87%), hydro (2.85%), and solar power (2.60%). More than a quarter (26.5%) of Jamaica's electrical output is lost through poor transmission and distribution infrastructure.

A project in Jamaica, pairing utility-scale solar with battery energy storage at a microgrid could become "a

model for other countries in the Caribbean and beyond", the head of the country's main utility has said.

The Jamaica has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Jamaica's energy mix is comprised of 14% renewable energy on the public grid. Its electrical demand peaks at 660MW and its electricity prices are comparable relative to ...

CARICOM's trade body is set to approve an extension of the suspension of a tax on Jamaica's importation of nine renewable and energy efficient technologies, including lithium-ion batteries, from outside the region. A two-year suspension of the Common External Tariff (CET) is due to end December 31.

CARICOM's trade body is set to approve an extension of the suspension of a tax on Jamaica's importation of nine renewable and energy efficient technologies, including lithium-ion batteries, from outside the region. ...

**2020 ENERGY REPORT CARD INTRODUCTION** This document presents Jamaica's Energy Report Card (ERC) for 2020. The ERC provides an overview of the energy sector performance in Jamaica. The ERC also includes energy efficiency, technical assistance, workforce, training, and capacity building information, subject to the

With a clear vision and a strategic plan, Jamaica can build a modern, resilient energy system that not only meets its current needs but also positions the country as a leader in green energy in the Caribbean. By following the examples of Uruguay and Costa Rica, Jamaica can rapidly transition to a cleaner, more reliable energy system.

FosRich Company Limited will test Jamaica's receptivity to a commercial-grade energy storage system over the next few months, successes of which will see the company pumping some \$500 million...
