

Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save over a tonne and a half of carbon dioxide per year - that's more than 30 tonnes over its lifetime.

Solar photovoltaic (PV) systems are made up of panels that fit on top of your roof, but you can also install them on the ground or fit solar tiles. Solar PV cells are made from layers of semi-conducting material, usually silicon. When sunlight shines on the panels or tiles, electrons create a flow of electricity.

FuturaSun coloured photovoltaic panels combine efficiency with striking aesthetic appeal. They perfectly integrate with the roofs, facades, and balconies of residential, historical, and high-value buildings, flawlessly preserving specific aesthetic and colour characteristics.

Solar thermal panels convert light to heat (more specifically, hot water) and photovoltaic (PV) panels convert it to electricity. Light is available to us every day, to a greater or lesser extent, and both thermal and PV panels produce energy every day, to a greater or lesser extent.

Solar photovoltaic panels - Solar PV panels are installed on your roof and use silicon based technology to collect sunlight and change it into electricity. Solar PV panels can last up to 30 years, won't freeze during cold weather and can provide up to 60% of the energy you need.

FuturaSun coloured photovoltaic panels combine efficiency with striking aesthetic appeal. They perfectly integrate with the roofs, facades, and balconies of residential, historical, and high-value buildings, flawlessly preserving specific ...

Using a unique technique, Solarix produces coloured solar panels with a deep colour experience in combination with high-energy generation. The innovations in high-quality ceramic colour techniques in the Solarix colours ensure that the solar panels match perfectly with other materials in construction, such as stone, composite, wood and aluminium.

We offer a range of affordable solar PV solutions that are easy to install and maintain. Our solar power systems are designed to integrate seamlessly into your home, and we offer a variety of panel options to suit your aesthetic preferences.

FuturaSun coloured photovoltaic panels combine efficiency with striking aesthetic appeal. They perfectly integrate with the roofs, facades, and balconies of residential, historical, and high ...

Unrivalled experience of solar in Jersey. Built up from years of experience over hundreds of local installations since 2013, we guarantee the best service and installation quality. The company has matured with a focus on energy optimisation along side solar as its core product.

Retrofitting Solar to Your Existing Roof. SunWorks offer a select range of specialist solar products which can be selected for almost any roof type. Our solar panels come from reputable brands, featuring robust warranties that extend up to 25 years.
