

The growing trend of intelligent devices ranging from wearables and soft robots to artificial intelligence has set a high demand for smart batteries. Hydrogels provide opportunities for smart batteries to self-adjust their functions according to the operation conditions. Despite the progress in hydrogel-based smart batteries, a gap remains between the designable functions ...

Made in the USA and founded in 1925, Trojan Battery Company has become the world's leading manufacturer of deep cycle Solar and Motive batteries, with a broad range of energy storage solutions that include deep cycle flooded, AES, AGM, gel, and lithium-ion batteries.

A research team has successfully enhanced the performance and durability of all-solid-state batteries. This breakthrough was made possible through the implementation of a novel approach known as bottom electrodeposition. Their research has been published in Small. Secondary batteries generally rely on liquid electrolytes when used in various applications, ...
