

Who makes aentron batteries?

The aentron GmbH, founded in Gilching near Munich, is a provider of high-quality lithium-ion batteries for industrial applications. The aentron energy storage solutions are developed and produced in Germany and are characterized by their robust design, scalability, modularity and safety.

What is aentron energy storage?

The aentron energy storage solutions are developed and produced in Germany and are characterized by their robust design, scalability, modularity and safety. Furthermore, due to the modular design concept, battery voltages from 12 V to 900 V are possible allowing a wide range of applications.

Why is aentron partnering with the European Union?

Moreover, aentron is also poised to further reduce the costs of its solutions through its partnership with the European Union on the Horizon 2020 COBRA project and build safer batteries by working collaborations with leading academic institutes.

How can aentron reduce the cost of ownership?

This allows the company in a novel way to reduce the total costs of ownership by reducing its batteries' live-time for energy-intensive applications. Above all, the entirety of aentron's portfolio is certified by the international maritime accredited registrar DNV GL.

What certifications does aentron have?

Above all, the entirety of aentron's portfolio is certified by the international maritime accredited registrar DNV GL. With such unparalleled capabilities, aentron has ignited several client success stories since its inception in 2015.

What are aentron's core competencies?

Discussing the core competencies of the company, Jan Brandt, CEO of aentron, says, "Our batteries are specifically designed for unique applications, and leverage standardised voltage configurations based on our client's needs."
