

How many solar power plants are there in Kazakhstan?

Solar Power: The potential of solar energy in Kazakhstan is estimated at 2.5 billion kWh per year. Solar energy can be widely used in two-thirds of Kazakhstan's territory. The government aimed to put 28 solar power plants into operation by the end of 2021, and met this goal, with currently 51 solar power plants in operation.

How big is solar capacity in Kazakhstan?

Back in 2015, Astana was predicting installed solar capacity by the end of 2020 to reach 714 MW. A government report last month said solar capacity had reached 467 MW. Indeed, renewables are still small fry in Kazakhstan. Today solar accounts for 56 percent of the country's total renewable capacity.

What is Kazakhstan's largest solar project?

Kazakhstan's largest solar project - a 100 MW field in Saran, Karaganda Province - was opened last year by a German company, also with EBRD backing. Russian engineers doubled capacity at the EBRD-backed Burnoye plant in Zhambyl in 2018.

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

Can solar power drive Kazakhstan's Energy Transition?

However, Kazakhstan's solar ambitions do not fully tap into its potential, and the technology could play a far larger role in the country's energy transition due to its low cost and flexibility. The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources.

What's new in Kazakhstan?

This update contains the latest economic and political advancements in the country, including the announcement of Kazakhstan's new decarbonisation target for 2060, and the recent Memorandum of Understanding signed between the EU and Kazakhstan, stepping up cooperation on renewables, green hydrogen, and battery value chains.

This report builds on the first edition of solar investment opportunities in Kazakhstan and provides the latest economic and political advancements in the country, including the announcement of Kazakhstan's new decarbonisation target for 2060, and the recent Memorandum of Understanding signed between the EU and Kazakhstan, stepping up ...

Listed below are the five largest active solar PV power plants by capacity in Kazakhstan, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to provide a complete picture of the global solar PV power segment.

Initial production targets aim to roll out 300 units of solar panels this year, with plans to scale up significantly to 6,000 units annually by 2025 and 2026. Looking ahead, the production is expected to surge to 30,000 panels ...

The photovoltaic plant, spanning 100 hectares of land, will produce up to 90 GWh of electricity annually and will feature over 93,000 solar panels and an electrical substation. These components will be integrated into the local grid through a new overhead powerline extending for 7.5 kilometers.

This 150MW solar PV project is Arctech Solar's second time cooperation with Hevel Group, the owner and EPC of the Kazakhstan solar PV projects, following Nura solar PV projects using 100MW of fixed structure in Kazakhstan. So far, the company has accomplished total shipments over of 420MW tracking systems and fixed structures to the country.

Solar power directly contributes to the Kazakhstan's energy security and independence, as well as helping to meet rising electricity demand and CO2 emission reduction goals. Despite the COVID-19 impasse, around 141 GW of new solar PV capacity was added worldwide in 2020, about a 14% increase from 2019.

Nurlan Zhakupov, the chair of the Samruk-Kazyna National Welfare Fund, and Lyu Zexiang, the head of China Energy International Group (CEIG), have agreed to collaborate on the construction of a solar power plant and the supply of components for wind power stations. The new agreement is the continuation of an arrangement reached by the fund and China Energy ...

Hevel Group, Russia's integrated company in photovoltaics selected Arctech Solar to supply 150MW two-in-portrait (2P) trackers to Hevel's solar PV projects in Kazakhstan. The project is noteworthy in this region deploying 2P trackers and bifacial modules to date.

The company's project pipeline in Kazakhstan includes Sarybulak SPP (4.95 MW), Kapshagai SPP (3 MW), Kushata SPP (10 MW) and Shoktas SPP (50 MW), which were acquired in 2019, as well as a solar power plants in Kentau and Shymkent with a total capacity of 70 MW, which were awarded to Hevel in 2018 as a result of the solar auction.
