

Which project will boost Kazakhstan's oil production in 2024-25?

Tengiz: Future Growth Project is main source of Kazakhstan's incremental oil production during 2024-25. Kashagan: Phase 2 development is likely to lift project output through 2030s, cushioning overall national production decline trajectory.

Is Kazakhstan at a crossroads in its energy sector?

Kazakhstan, a vast and resource-rich nation in Central Asia, is at a crossroads in its energy sector. With a growing emphasis on sustainability and a need to align with global decarbonization efforts, the country is embarking on a transformative initiative that aims to ensure the security and reliability of its energy supply.

Should Kazakhstan adopt an energy security strategy in 2023?

2023 S&P Global. Kazakhstan should articulate and adopt an official Energy Security Strategy document, guided by these general observations (this has to be a flexible document that can be modified to reflect changing circumstances). Kazakhstan's officially reported GHG emissions totaled 340.8 MMt CO₂e in 2021, down 7% from 367.7 MMt CO₂e in 2015.

Is Kazakhstan phasing out inefficient subsidies and modernizing its energy infrastructure?

Kazakhstan's energy sector has long been dependent on fossil fuels, and the country now faces the challenge of phasing out inefficient subsidies and modernizing its energy infrastructure.

Will Kazakhstan's Energy Transition be a model for other countries?

Kazakhstan's progress on the energy transition can serve as a model for other countries in the region and beyond on advancing a just transition away from fossil fuels—helping to build a more sustainable, resilient economy for all.

Will Kazakhstan achieve its INDC conditional emissions target by 2030?

Given its current trajectory, Kazakhstan may not achieve its INDC conditional emissions target by 2030; national GHG emissions may even drift upwards in early 2020s with further economic recovery and higher energy consumption; a more concerted effort is needed to reverse this.

Kazakhstan is a significant producer of coal, crude oil and natural gas, and a major energy exporter. While coal dominates the country's energy mix, renewable sources of energy account for 9% of its electricity generation. ... Kazakhstan ...
