

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

Where can photovoltaic panels be installed in Cyprus?

Photovoltaic systems can be installed on flat and inclined roofs and on the ground. Our team can visit the place where you want the solar panels to be installed, evaluate the amount of space, sun exposure and possible shading and suggest the best place so that you make the most out of your photovoltaic panels in Cyprus.

What is Gesolar Cyprus Ltd?

Gesolar Cyprus Ltd is one of the first companies in Cyprus that is active in the field of photovoltaic systems. They provide the best solution for their customers' every energy need, both during the design phase of an energy-photovoltaic project and in supporting the project after its completion.

What is a solar pump in Cyprus?

Solar pumps in Cyprus are pumps that work with the energy generated by solar panels. Solar pump maintenance is very important to ensure that the system works as it should and that the water is clean.
