

What is Kuwait Energy Outlook?

The platform came in the form of Kuwait Energy Outlook, an energy policy platform supporting efficient coordination between the energy sector stakeholders that assures coordination and robust development among them to realize the country's domestic and international responsibilities operated and managed by national capacities.

Who was the project coordinator for the Kuwait Energy Outlook?

Mohamed Nassar was the project coordinator from the UNDP. Special thanks go to Khaled Mahdi, Secretary-General of the General Secretariat of the Supreme Council for Planning and Development, for his commissioning and sponsorship of this work. The editorial committee of the Kuwait Energy Outlook provided valuable insights and feedback.

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.

Will Kuwait increase the share of renewables in energy demand?

Kuwait has a soft target of increasing the share of renewables in total energy demand to about 15% by 2030, up from less than 1% today. The potential for increasing the share of renewables in the electricity generation mix in Kuwait is huge, given its substantial solar and wind resources. Central Statistics Office,

What type of energy is used in Kuwait?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Kuwait: How much of the country's energy comes from nuclear power?

Does Kuwait need solar power in 2035?

Despite some progress in supporting solar generation, in the Business-as-Usual Case, the share of renewables in total primary energy demand remains low in 2035, only 3%. Electricity generation capacity in Kuwait increases by over 13.2 gigawatts over the Outlook period, reaching 32 GW in 2035, a 70% increase over capacity in 2018.

Most of Kuwait's gas is associated with crude oil production and tends to fluctuate with changing OPEC+ quotas. Kuwait has an oil production capacity of around 3mn b/d but output is lower because Kuwait was among eight OPEC+ producers to agree voluntary production cuts, which cap its oil production at 2.4mn b/d until at least the end of June.

18 Dec 2018; Kuwait, Dec 15 (KUNA) -- His Highness the Prime Minister Sheikh Ahmad Abdullah Al-Sabah on Sunday received the Ministers of Oil and Energy from member states of the Organization of Arab Petroleum Exporting Countries (OAPEC), along with the organization's Secretary General Jamal Issa Al-Loughani, on the occasion of their visit to Kuwait for the ...
