

Will solar help Israel achieve energy independence?

The Israeli government is betting hard on solar and energy storage to help the nation towards energy independence. Energy minister Yuval Steinitz this week announced a new plan to deploy around 15 GW more solar capacity to help raise the 2030 target for the proportion of national electricity drawn from renewables from 17% to 30%.

Are photovoltaic solar panels available in Israel?

There are various size fields with photovoltaic solar panels in Israel. These solar energy producers have an agreement with the Israeli government, ensuring the electric company will purchase the energy at a price that fluctuates according to the market's cost production. Between 2004 - 2017 Israel's energy usage more than tripled itself.

Can Israel use solar energy?

Additionally, many of the solar power plants incorporate other means of electricity production. Now, Israel has begun the process of building storage facilities for solar energy so that the country can rely more on solar energy sources.

Should Israel build solar energy plants in the Negev desert?

The Negev Desert and the surrounding area, including the Arava Valley, are the sunniest parts of Israel, and little of this land is arable, which is why it has become the center of the Israeli solar industry. David Faiman thinks the energy needs of Israel's future could be met by building solar energy plants in the Negev.

Does Israel have a potential for solar energy innovation?

Israel, a small Mediterranean and Middle Eastern country with over half the country covered in a desert climate ideal for solar energy innovation, has much potential for further innovation and development in the field of solar energy.

How much solar power does Israel have?

That strategy included the deployment of 2 GW of solar generation capacity. Israel had around 1.19 GW of solar capacity at the end of last year, according to International Renewable Energy Agency figures. Developers installed around 120 MW of solar in Israel last year.
