

How much money will Luxembourg get from a new solar project?

From pv magazine France Luxembourg's Ministry of Economy and Ministry of Energy have chosen 85 projects totaling 43.3 MW in the country's inaugural solar self-consumption tender. The selected projects will receive EUR16.1 million (\$17.2 million) in rebates out of a EUR30 million budget.

When will Luxembourg launch a second solar tender?

The ministry plans to launch the second tender of this kind in July. As of the end of 2022, Luxembourg had approximately 319 MW of installed PV capacity, with around 42 MW of new solar additions last year, according to the International Renewable Energy Agency. What is Luxembourg's Energy Policy?

As part of an energy policy geared towards a sustainable, secure and competitive energy supply, this financial aid is aimed at improving the energy performance of single-family houses or apartments. Luxembourg wants to accelerate the timelines for renewable energies in order to reach around 25% clean energy by 2030 and 100% in the long term.

Will Luxembourg transition to climate neutrality?

The transition to climate neutrality seems to be making great strides. With 306.3 hours of sunshine in April, which is well above average, the exceptional weather was one of the reasons behind the historical peak of solar energy in Luxembourg.

How has teleworking impacted solar energy demand in Luxembourg?

The high number of sunshine hours in spring coupled with an increase in the photovoltaic surface area over recent years have been key factors in reaching a historical peak of solar energy in Luxembourg in March and April 2020. In addition, teleworking during the weeks of lockdown had a positive influence on electricity demand, which declined.

What's next for solar panel and heat pump grants in Luxembourg?

Residents of Luxembourg can currently benefit from 62.5% state support when installing solar panels, a policy in place until 1 July 2024. Since early 2024, the Socom company has been producing solar panels in Hollerich.

Going solar means you will protect yourself against the big utility providers and their price - hikes - and you'll receive lower electricity bills each month. You have virtually no maintenance as solar panels last over 30 years. Solar can be used to heat ...
