

Who is hexagon energy?

Over the past 13 years, the principals of Hexagon Energy have developed and financed over 6,500 MW of energy, representing over \$1 billion USD in invested capital. We bring this experience and insight to every project. We pursue the best opportunities across all new energy technologies, building a diverse and balanced portfolio.

How will Madagascar's new telecommunications project impact the world?

The project will also enable 3,400,000 new internet users and connect some 2,000 health centers and schools to renewable energy and digital services. " Access to energy and telecommunications are top priorities for our government. This project is fully aligned with our vision for the development of Madagascar.

How much electricity does Madagascar have?

In Madagascar, only 15% of the population has access to electricity. In 2017, the country had just 570 MW of mainly thermal (60%) and hydroelectric (40%) installed production capacity. Furthermore, only 60% of this energy is truly available owing to poor maintenance of power plants.

Does Madagascar have a high solar energy potential?

Due to its location, Madagascar has a high solar energy potential. As shown in Fig. 5, the Global horizontal irradiation is 2000 kWh/m². Almost all regions have more than 2800 h (350 sunny days) of annual solar radiation. In the west coast, solar radiation ranges from 4000 to 6500 kWh/m².

Why is hexagon energy planning early development projects?

Hexagon Energy is planning early development projects that capitalize on strong government incentives and unique geographic constraints. The world's oldest source of renewable energy, biomass power (or biopower) generation is expected to grow more than fivefold over the next 25 years.

Which energy sources are used in Madagascar?

According to the energy inventory drawn up by the MEM⁴ and the study report of the CREAM⁵, wood energy has the highest share (92%) in the total energy supply in Madagascar, followed by fossil fuel (7%). Only less than 1% of this demand is supplied by other renewable energy sources.

Our team at Hexagon Energy is so proud to contribute 1 of the 10 projects mentioned powering over 200,000 homes with carbon-free energy in Virginia. Developed by Hexagon, Racefield Solar is a 3 MW DG project located in James City County, VA. Not only will these 10 projects produce clean energy for the Commonwealth, but they will also "support ...
