

What is mgtes (Magaldi green thermal energy storage)?

The MGTES (Magaldi Green Thermal Energy Storage) is a flexible Thermal Energy Storage(TES) system based on fluidized-sand bed technology.

Who is Magaldi green energy?

We can do great things. Together. Magaldi Green Energy is a start up focused on the development and commercialization of innovative technologies, specialized in renewable energy generation and storage.

What is Magaldi mgtes?

developed and consolidated by Magaldi in recent years, capable of playing an important role in the global decarbonization and energy optimization of industrial process. MGTES is a high temperature TES featured by fluidized bed of solid particles capable of receiving energy in the form of both electricity and heat through immersed elements.

How can Magaldi support the transition from fossil fuels to renewables?

We have organised a high seniority team to integrate Magaldi's knowledge of the fluidised bed and ultra-high temperature material handling. Viable thermal energy storage will be the lynchpin that guarantees success in the transition from fossil fuels to renewables.

What can Magaldi do to decarbonize industries?

Magaldi Group addresses these challenges with its innovative solutions to decarbonize industries. AI, "super forecasting," and long-term energy storage: The ideal combination for the energy transition. What happens when the sun isn't shining or the wind isn't blowing?

Magaldi Green Energy offers patented breakthrough technologies to enable the energy transition by storing renewable electrical energy in the form of heat to release green thermal energy on demand. See how we are developing worldwide.

MGTES - Magaldi Green Thermal Energy Storage is the first zero-impact energy storage system capable of providing thermal energy to industries, fully replacing the use of fossil fuels, primarily gas and diesel.

Protected by a worldwide patent, MGTES - Magaldi Green Thermal Energy Storage technology is unique thermal storage solution specifically designed for industries to reduce industrial fossil fuel energy consumption and facilitate the acceleration of energy transition processes towards renewables.

MGTES is a patented and innovative system for thermal energy storage, based on fluidized sand bed. Once charged with renewable energy or directly from the grid, the system is able to store clean energy for hours, days or even weeks to release 24/7 high temperature thermal energy (e.g. hot steam), continuously or not.

Magaldi Green Energy develops innovative technologies for thermal energy storage. It is part of the Magaldi Group, which was founded in Italy in 1929 and is a leader in providing customized solutions for conveying materials at extremely high temperatures (over 1000°C) and under severe process conditions.

Incorporated in 2021, Magaldi Green Energy srl is a start-up focused on the development and commercialization of innovative technologies in the field of renewable energy generation and storage. Its aim is to lead the path to energy transition through the development of breakthrough storage technologies capable of decarbonizing the industrial ...

Visit our website and find out more about MGTES, our Green Thermal Energy Storage system. Based on fluidized sand bed technology, MGTES allows to store thermal energy from renewable sources or directly from the power grid, when ...

The MGTES (Magaldi Green Thermal Energy Storage) is a flexible Thermal Energy Storage (TES) system based on fluidized-sand bed technology. Charged with surplus energy generated by renewable sources, it produces green thermal energy -- steam or hot air -- which can be used directly in industrial plants or for the generation of electricity ...

Incorporated in 2021, Magaldi Green Energy srl is a start-up focused on the development and commercialization of innovative technologies in the field of renewable energy generation and storage. Its aim is to lead the path to energy ...

Protected by a worldwide patent, MGTES - Magaldi Green Thermal Energy Storage technology is unique thermal storage solution specifically designed for industries to reduce industrial fossil fuel energy ...

Magaldi Green Energy develops innovative technologies for thermal energy storage. It is part of the Magaldi Group, which was founded in Italy in 1929 and is a leader in providing customized ...

Visit our website and find out more about MGTES, our Green Thermal Energy Storage system. Based on fluidized sand bed technology, MGTES allows to store thermal energy from renewable sources or directly from the power grid, when the price is low and dispatch it when it is needed.
