

What is Malaysia's Energy Transition outlook?

It also presents sector-specific technological pathways and investment opportunities that will help Malaysia to accelerate its energy transition. The Malaysia energy transition outlook provides a comprehensive, renewables-focused, long-term energy pathway for the transition to a cleaner and more sustainable energy system in Malaysia.

What is Navitas semiconductor?

Navitas Semiconductor (Nasdaq: NVTX) is the only pure-play, next-generation power-semiconductor company, founded in 2014. GaNFast(TM) power ICs integrate gallium nitride (GaN) power and drive, with control, sensing, and protection to enable faster charging, higher power density, and greater energy savings.

What does Navitas do?

"As an advanced supplier in the field, Navitas will assist in creating more advanced, energy-efficient, and higher-efficiency power system products. I believe the establishment of this joint lab will comprehensively accelerate the design and market launch of SHINRY's products and further enhance the market competitiveness of SHINRY products."

Why is enabling cross-cutting enablers important for Malaysia's Energy Transition?

Ultimately, navigating this energy transition through all the macroeconomic and geopolitical uncertainties is inevitable. The support from energy transition levers and enabling cross-cutting enablers is therefore more important now than ever to attain Malaysia's energy transition ambition and macro position.

Who is the CEO of shinry & Navitas?

On January 16th, 2024, Peter (Jingjun) Chen, COO of SHINRY, along with Navitas' Gene Sheridan, CEO and Navitas' Charles (Yingjie) Zha, VP and GM plus other senior executives attended the joint lab's opening ceremony at SHINRY headquarters in Shenzhen.
