

How much does a solar project cost in Maldives?

In 2022, 63 investors expressed interest in the third 11 MW solar project in the remote islands of Maldives, and a record low price of 9.8 US cents was received. This is one of the lowest tariffs for any small island developing state (SIDS).

Will the Maldives install 20 MW of solar power?

The Maldives plans to install 20 MW of solar power across 20 islands. The government has launched a tender for this project and it will be supported by the Asian Development Bank (ADB). The solar projects will be developed under a design, build, finance, own, operate, and transfer basis.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors' bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

What are the challenges facing solar projects in Maldives?

Challenges facing such projects include integrating solar with existing power sources on the grid, off-taker risk, weak procurement, and planning capacity. The objective of the ASPIRE project is to increase photovoltaic (PV) generation in Maldives through private-sector investment. Approved in 2020, the ARISE Project scaled up this process.

When will the Aspire project start in the Maldives?

The inauguration of the 5 MW solar project on December 7, 2022 under the ASPIRE project has been a game changer in the energy transition journey of the Maldives.

How many MW of PV will Maldives have in 2022?

According to the International Renewable Energy Agency, Maldives had approximately 36 MW of installed PV capacity by the end of 2022. Interested developers have until Aug. 10 to register with the country's Ministry of Finance for the tender process.
