

How does electricity work in the Maldives?

Today's electricity and transport systems in the Maldives are heavily dependent on fossil fuels. For example, currently less than ten percent of electricity is generated via solar photovoltaic panels.

How can the World Bank help the Maldives?

As a trusted development partner, the World Bank is helping the Maldives reduce fossil fuel consumption in the power sector and mobilise significant local savings for a fast-paced recovery and achieve prosperity for generations of Maldivians.

Will the Maldives achieve 70 percent renewable power by 2030?

" The proactiveness of the government, combined with development financing from organisations such as the World Bank will help the Maldives achieve the target of 70 percent power from renewable sources by 2030.

Will Maldives become net-zero by 2030?

Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment towards climate change and renewable energy targets when President Ibrahim Mohamed Solih announced the country's ambition to become net-zero by 2030 at the UN Climate Ambition Summit in December 2020.

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.

How will ASPIRE and ARISE help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.
