

Over the past 17 years, Masdar has become one of the world's largest renewable energy investors and drivers of the energy transition. Our momentum will see us accelerate global clean energy growth, expand our renewable energy footprint, and play a vital role in delivering the UAE's Net Zero by 2050 strategic initiative.

The report reveals Masdar's score of 2 and an entity score of 71 from Sustainable Fitch, a leading sustainability rating agency, reflecting the company's strong ESG performance and the green credentials of its assets.

With several significant projects launched in 2023, Masdar's expanding portfolio has had a marked impact on global sustainability. Notable projects in both new and existing markets, including Indonesia, Saudi Arabia, the UAE, Egypt, and Azerbaijan, either commenced operations or were formalized through agreements.

Masdar is proud to be a strategic partner with many world-leading energy companies in the UAE and international markets. Working alongside government and business, we are helping to demonstrate the long-term economic viability of renewable energy while creating long-term value for Abu Dhabi.

This landmark report also emphasizes Masdar's steadfast commitment to integrating robust Environmental, Social, and Governance (ESG) practices throughout the organization, bolstered by its pioneering green bonds initiative, which has earned top ESG ratings.

In addition, the Sustainability Report, which encompasses Masdar's global operations for 2023, outlines the company's roadmap for a \$3 billion Green Bond offering at the London Stock Exchange, aimed at facilitating investments in renewable energy worldwide.

Masdar grew its clean energy portfolio and advanced pipeline of clean energy capacity to 31.5GW in 2023, generated more than 26,700GWh of clean energy and avoided 14 million tonnes of CO2e, up from 10 million
