In 2008, the Central African Republic (CAR) became the fourth country to be placed on the agenda of the UN Peacebuilding Commission. In addition to poor governance, insecurity, high inequality and social marginalization, the management of CAR's abundant natural resources represents one the many challenges to stability faced by this impoverished nation of 4.3 million ...

The synergies with renewable energy generation to provide access to low-carbon energy for rural enterprises such as agricultural processing industry - as emphasized in rural revival policy - will trigger a larger multiplier

effect on all the SDGs via SDG 7. ... The Central African Republic's gross government debt, projected at 49.1% of GDP in ...

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

Pre-Crisis Phase (August 13, 1960-December 30, 1965): Central African Republic formally achieved independence from France on August 13, 1960, and David Dacko of the Movement for the Social Evolution of Black Africa (Mouvement pour l'Evolution Sociale de l'Afrique Noire - MESAN) was elected president by the National Assembly on August 14, 1960.
