Currently, the primary emphasis is on solar energy, but there are plans to expand into various other renewable energy technologies, including wind energy and biomass energy, in the near future, driven by the global growth in the renewable energy industry.

When we first started to branch out into solar, it was ran out of a small corner in the Windhoek Megatech branch next door. Over the past 3 years, we saw exponential growth and interest in the solar industry, and the advantages that solar technology offers both to communities and to the wellbeing of the environment.
