Merlin Power's range of KISAE battery chargers offer fully automatic, multi-stage battery charging, for up to three separate battery banks. As the ultimate set-and-forget chargers, they use charging algorithms designed to quickly & accurately recharge & maximize the life of AGM, Gel, Flooded or Lithium batteries.

Merlin Power has over 30+ years of experience in the design, manufacture, and supply of market-leading batteries, battery monitors and electrical power management systems. Based in Exeter, UK, our products are increasingly utilised on applications ranging from military vehicles, to luxury yachts and leisure vehicles.

The Powersine 1400-24 Inverter, a part of our Heavy Duty Inverters collection, utilises hybrid power conversion technology to provide significant benefits over low-cost, leisure style, switch-mode inverters and are designed specifically for mission critical applications where lives and livelihoods depend on power.

Merlin Power's range of flat battery protection devices are specifically designed to prevent battery damage through excessive discharge, ensuring they retain enough power to ensure engine restarting. Whether you have a 12V or 24V system, installing Merlin Power's PowerGuard Lite, or PowerGuard Pro has you covered.

PowerBank Lite 200/24/2 boasts a remarkable 3-in-1 functionality, providing split charging, battery isolation, and flat battery protection all in one compact unit, offering quicker and simpler installation. This innovative approach eliminates the need ...

Measure the voltage of C1 and C2 at the CPU and contactor - briefly 12V dropping to approx. 6.5V. Test your wiring between the batteries, CPU and Smartgauge. Test the contactor by applying 12V to the C1 & C2 connections. Report your findings to Merlin Technical Department who will advise you on your next steps (technical@merlin-power).
