

What is Hawker evolution?

Traction batteries Hawker evolution Maintenance free energy with reduced charging time (8 hours at 60 % DOD) The Hawker evolution is a new valve regulated gas recombination battery with gelled electrolyte, accepting up to 80% DOD/C5. This range is suitable for use in materials handling equipment in low to medium duty applications.

Does Hawker have a high frequency charger?

Hawker has developed for their high frequency chargers, Hawker Lifeplus and Powertech, a specially designed charging regime, which ensures a safe and gentle full charge of the Hawker evolution battery with a low charging factor.

Why should you choose Hawker branded batteries?

The Hawker branded battery range, matched chargers and systems provide trouble free performance under the most demanding service conditions. Our strategically located manufacturing plants are efficient and responsive with a culture of continuous improvement and added value for our business partners.

99,99% reinem Blei. Sie ist absolut wartungsfrei und auslaufsicher. Spannung [V]: 12 V;

Featuring robust tubular vented technology (PzS), Hawker's evolution batteries are suitable for use in forklift trucks, pallet trucks, electric vehicles and automatic transport systems for low- and normal-duty applications. These valve regulated gas recombination batteries with gelled electrolyte are ideal for use in sensitive environments.

"Hawker batteries manufactured with TPPL technology have been powering military and business jet aviation applications for years," said Steve Benulis, marketing director at EnerSys. "EnerSys is pleased to bring a product to the commercial aviation market with the same distinct advantages and standards that the military demands."
