Using our energy expertise we help you to optimize the production of power and heat by effectively using fuel sources that are available to you. The OP16 Radial Gas Turbine has been designed to ensure maximum fuel flexibility and low emissions allowing Destinus to lead the world's energy transition with clean and

sustainable energy.

Additionally, we have a sister company, Optimal Renewable Gas, which is actively engaged in the development of biomethane projects in Australia. Green Hydrogen Green hydrogen holds significant promise for nearly eradicating emissions by leveraging renewable energy sources, even during non-optimal periods, to facilitate water electrolysis.

At Optimal Energy Solutions, we specialize in designing and installing cutting-edge solar PV systems, solar battery storage solutions, and air source heat pumps.
