

Why should you use Modula?

Modula's American-made automated storage and retrieval systems transform your material handling - dramatically boosting productivity and accuracy, reducing storage space requirements, and enhancing worker safety and job satisfaction.

How much inventory can Modula store?

The Modula system was able to store approximately 90% of our inventory - we couldn't believe it! Modula saves us hours every day in set up time and the convenience of having all our inventory in one location. When we needed service, we had it within a couple hours of our call and the problem was solved. We are really happy.

What services does Modula offer?

Modula offers all its customers a wide range of services related to automated vertical warehouses. Modula is an Italian company that designs and manufactures automated vertical warehouses suitable for any industrial sector or environment.

Where are Modula products made?

Made in the USA, Modula products are available from dealers across North America who are ready to help you find the innovative solutions that best serve your needs. The Modula systems enable us to pick components for kits much faster as the operators used to walk between sections, looking down rows of aisle trying to find a specific location.

Who is Modula?

In 1987, Modula developed the first vertical lift module in its Italian factory, and since then, we have been favored by over 20,000 customers in various business sectors, not only successfully revolutionizing their warehouse management. We have also brought their working environment to a new ergonomic level.
