

Who is a solar distributor?

In many cases, the answer is a solar distributor. Solar distributors are a major component of the solar industry. Though invisible to most solar shoppers, they factor heavily into the value chain overall.

Are solar distributors a part of the value chain?

For most solar consumers, solar distributors are (and will continue to be) a largely hidden part of the value chain: When you receive quotes from local or national installers on EnergySage, you can compare different types of equipment from other manufacturers.

Who are the biggest solar distributors in the US?

Some of the biggest distributors in the US include, but are not limited to: BayWa r.e.: Munich-based company focused on agriculture and energy; provides solar products and services across the spectrum (and worldwide)--leading solar distributor in North America and worldwide. Wesco: publicly-traded company on the NYSE.

Why do you need a solar distributor?

Distributors play a critical role in the solar industry by helping the right solar solution get to the right installer at the right time. For instance, a solar distributor can alleviate the need for individual solar installers to carry large amounts of equipment inventory.

Should you hire a solar distributor?

For instance, a solar distributor can alleviate the need for individual solar installers to carry large amounts of equipment inventory. Instead, solar contractors can wait to purchase the necessary equipment until a homeowner moves forward with a project.

Solar Products Distributors Distributors are those companies working as big warehouses that served as the middlemen between the consumer/customer and the manufacturer. Typically, in distribution, a company is handling the sourcing, stocking and logistics but nowadays they are also helping manufacturers in product designing and solving other business conflicts. Aside ...
