

Can solar panels be installed on a north-facing roof in South Africa?

Your solar panels should be in the sun all day to be able to produce solar power. So north-facing is best in South Africa. However, if your roof is not north-facing, you can still produce solar power by installing two arrays, one on the east and one on the west-facing roof.

How much does solar installation cost?

Installation Labor: Hiring a professional installer is essential for ensuring the proper setup and functioning of your solar system. Installation labor costs can vary but generally range from \$3,000 to \$10,000. **Energy Savings:** One of the primary benefits of solar installation is the reduction in energy bills.

Would you recommend metrowatt if you have a solar installation?

Laurent and his team was fast, efficient and very helpful. Answered all the questions we had to assist us in coming up with the correct solution, therefore I would highly recommend Metrowatt if you are thinking of having a solar installation installed at your house. I'd been investigating solar solutions for a while before I came across Metrowatt.
