

What is Montenegro's rooftop PV program?

Montenegro's first attempt to support rooftop PV is the net metering program. Although the program is limited in scale, it is being implemented by the EPCG. The EPCG is also building a 100 MW solar park in partnership with Finnish utility Fortum and a floating PV power plant on the Slano artificial salt lake.

How much solar power does Montenegro have?

Montenegro had installed solar power capacity of just 6 MW at the end of 2020. The country's solar power capacity is significantly smaller than the electrical power demand, which is currently met by the 225 MW Pljevlja thermal power plant in the north of Montenegro and two large hydropower plants, at Perucica (307 MW) and Piva (363 MW).

Where are solar power plants located in Montenegro?

Montenegro is rich in solar radiation, particularly in the southern part, especially around the cities of Bar and Ulcinj, and in the area around the capital city of Podgorica. Solar power plants are located in these areas due to the high solar radiation.

Montenegrin solar panel installers - showing companies in Montenegro that undertake solar panel installation, including rooftop and standalone solar systems. 5 installers based in Montenegro are listed below.

Montenegrin solar array builder EPCG Solar Gradnja has so far installed some 40 MW of photovoltaic systems on 4,300 rooftops of households and businesses in the country, its owner, state-controlled power utility Elektroprivreda Crne Gore (EPCG), said.

Montenegrin solar array builder EPCG Solar Gradnja has so far installed some 40 MW of photovoltaic systems on 4,300 rooftops of households and businesses in the country, its owner, state-controlled power utility Elektroprivreda Crne Gore ...

Montenegrin solar array builder EPCG Solar Gradnja has so far installed some 65 MWp of photovoltaic systems on 6,500 rooftops of households and businesses in the country, as part ...

Montenegro's public electricity provider, Elektroprivreda Crne Gore (EPCG), and the Ministry of Ecology, Spatial Planning, and Urbanism have launched a net metering scheme to support the installation of 3,000 residential rooftop PV systems.

Montenegrin solar array builder EPCG Solar Gradnja has so far installed some 65 MWp of photovoltaic systems on 6,500 rooftops of households and businesses in the country, as part of its ongoing Solari 5000+ project, its owner, state-controlled power utility ...

The initiative is expected to produce up to Euro 30 million in investment and 400 jobs according to the authorities. This is the company's first rooftop PV project and the EPCG is also building a 100 MW solar park in ...

Elektroprivreda Crne Gore (EPCG), controlled by the Government of Montenegro, recently revealed plans to install 15,000 more rooftop solar power plants, and the first phase is the launch of the Solari 5,000+ project.

Households and businesses can get a rooftop solar power plant and pay it off in installments smaller than their monthly electricity bill. After the installation, citizens will pay off the investment in monthly installments over ...

Elektroprivreda Crne Gore (EPCG), controlled by the Government of Montenegro, recently revealed plans to install 15,000 more rooftop solar power plants, and the first phase is the launch of the Solari ...

3 ???· So far, 1,260 PV rooftop systems were put into operation, with a total capacity of 9,445 MW. In addition, in December 2023, the first "ground mounted" SPP "Cevo" (3.25 MW) entered trial operation, followed by the issuance of a license to perform electricity production activities.

Montenegro's public electricity provider, Elektroprivreda Crne Gore (EPCG), and the Ministry of Ecology, Spatial Planning, and Urbanism have launched a net metering scheme to support the installation of 3,000 residential ...

Montenegro's state utility Elektroprivreda Crne Gore (EPCG) has launched a tender for 70 MW rooftop solar capacity in the country under its Solari 5000+ program with a budget of EUR70 million, inviting both individuals and businesses to ...

Households and businesses can get a rooftop solar power plant and pay it off in installments smaller than their monthly electricity bill. After the installation, citizens will pay off the investment in monthly installments over a period of five to ten years, and the installment will not be higher than their monthly electricity bill.

3 ???· So far, 1,260 PV rooftop systems were put into operation, with a total capacity of 9,445 MW. In addition, in December 2023, the first "ground mounted" SPP "Cevo" (3.25 MW) entered trial operation, followed by the issuance of a ...
