

Who is Wartsil energy storage & optimisation?

Wartsil Energy Storage & Optimisation is leading the introduction of disruptive, game-changing products and technologies to the global power industry. As a battery energy storage integrator, we're unlocking the way to an optimised energy future with our flexibility solutions.

Who is Wartsil energy?

Wartsil Energy is at the forefront of the transition towards a 100% renewable energy future. We help our customers and the power sector to accelerate their decarbonisation journeys through our market-leading technologies and power system expertise.

How did Wartsil's Energy Storage Division perform in 2022?

Wartsil's energy storage division saw a 20% year-on-year increase in sales and a 31% increase in order intake from 2022 to 2023.

What does Wartsil do in the marine market?

Learn about what we do in the marine market where Wartsil is a global leader in complete lifecycle power solutions. Wartsil is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. Why Wartsil?

What makes Wartsil unique?

Wartsil has a long-proven track record of 125+ system deployments globally, integrated with wind, hydro, solar and thermal generation -- all optimised by the industry-leading GEMS Digital Energy Platform. If playback doesn't begin shortly, try restarting your device.

Wartsil Energy's lifecycle services are designed to increase efficiency, promote reliability and guarantee operational performance. Our track record comprises 76 GW of power plant capacity and more than 110 energy storage systems delivered to 180 countries around the world.

Wartsil Energy (NYSE: WAT) is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. Why Wartsil? (NYSE: WAT) is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. Why Wartsil?

Key finding 2: 21% reduced emissions. The Balanced pathway sees a rapid decline in emissions as inflexible assets are phased out and replaced by renewables supported by energy storage and balancing power plants. Consequently, this pathway achieves a near 21% (19 Gt) reduction in cumulative emissions by 2050 compared to the Renewables and storage pathway.

By integrating renewables, energy management technology and storage with traditional energy resources, we reinvent clean energy production from the largest and most complex grids to the most remote and essential

islanded grids. We maximise value with energy storage.

With this agreement, W&#228;rtil&#228; will install an additional 700 megawatt hours (MWh) of energy storage capacity directly to the Eraring Stage 1 system. This project continues the successful partnership between W&#228;rtil&#228; and Origin, bringing the Eraring facility's total capacity to 700 MW / 2 800 MWh.

W&#228;rtil&#228; is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. We emphasise innovation in sustainable technology and services to help our customers continuously improve their environmental and economic performance.
