

Does Morocco need a solar power station?

Morocco plans to generate 42% of its energy from renewables by 2020, rising to 52% by 2030, with solar, wind and hydropower each providing a third of the total. The new Ouarzazate Solar Power Station will help Morocco meet its renewable power targets. Image: Solar Business Hub The country is well on its way to achieving that goal.

What percentage of Morocco's energy comes from solar?

By contrast, only 12.4% came from wind power, and 4.4% came from solar. However, Morocco is already making some tangible progress to boost its renewable energy generation, thanks to projects such as the huge Noor-Ouarzazate Solar Complex. With the first phase opening back in 2016, this is now the world's largest concentrated solar power plant.

Does Morocco have a strategy for solar energy?

The Moroccan government has a strategy for solar energy. In what follows, we focus exclusively on the solar component of the strategy. The Moroccan government was able to deploy its emergent regional position as a renewable energy leader to garner support for the solar plan and to cement a renewable institutional infrastructure simultaneously rooted in neoliberalism and political centralism.

Does Morocco have a solar diplomacy?

Morocco's solar diplomacy is further entrenched in its renewable energy plan, securing its strategic position in the regional energy sector as an intermediary between neighboring African and European countries.

Why did GIZ set up solar and wind power in Morocco?

GIZ convinced the Moroccan Ministry of Energy and the Agency for Energy Efficiency to set up a varied portfolio of energy sources, including both solar and wind power, for several reasons: favorable cost-benefit ratios for renewable energy (RE) in Morocco, expected job creation, and Concentrated Solar Power (CSP) as a promising area for industrial development.

Does Morocco's ambitious solar energy plan face challenges?

Source: International Energy Agency (IEA) . Morocco's ambitious initiative to diversify its electricity generation through a substantial expansion of solar power technologies, including PV panels and CSP, may face challenges due to the anticipated rise in dust and sandstorms in the region.
