

In a media statement released yesterday, Niue Premier -Hon. Dalton Tagelagi and Temporary Minister for Infrastructure-Hon. Ricky Makani met with Niue Power Corporation staff to discuss the ongoing development of the new power station.

With the upcoming reintegration of the BESS and solar farms by December, Niue is poised to move closer to its goal of 80% renewable energy production by the end of 2025. The Ministry now has both old and new power stations available to ensure consistent energy delivery to all communities.

The NPC reticulation team are proactively replacing transformers and cables wherever possible, however with over 100km of power reticulation in Niue, this is a major task. Support from the GEF funded AREAN project, along with NZ's commitment of \$20 million for renewable energy are addressing the stability of Niue's grid, funding the ...

The new website introduces fresh branding and provides detailed insights into Motive Energy's four key divisions: Sustainable Solutions, Industrial Batteries & Chargers, Energy Credits, and Automotive & Commercial Batteries.

With a nearly 50-year track record designing innovative power and energy solutions, Motive Energy will help your business transform the way you source, store and manage your energy.

At Motive Energy, reducing energy costs and boosting profits for our customers are fundamental to our services. By implementing advanced energy solutions, from efficient solar arrays to sophisticated battery storage systems, we ensure significant savings on energy expenses, directly enhancing our clients' bottom lines.

This project aims to enable Niue to generate 80% of its electricity from renewable energy by December 2025. Just over a month ago, the Prime Minister of New Zealand, Rt Hon. Christopher Luxon announced a substantial investment of \$20.5 million into renewable energy initiatives in Niue.

Target: 100% renewable energy target by 2020. Status: In progress; RES: Solar thermal and photovoltaics; Implementation: Niue is the smallest island in South Pacific inhabited by 14 communities. There are only ...

Target: 100% renewable energy target by 2020. Status: In progress; RES: Solar thermal and photovoltaics; Implementation: Niue is the smallest island in South Pacific inhabited by 14 communities. There are only 400

occupied households.

Alofi, Niue - IslandPower, the Institute for Strategy, Resilience and Security (ISRS) at University College London, and the Government of Niue have signed a Memorandum of Understanding (MoU) initiating a transformative energy project for 2024.
