

Attendees will learn how Kings County Courthouse was transformed into a more sustainable civic landmark with new Ice Bank's energy storage system. CALMAC Joins Trane ... Texas School District Lowers Peak Demand Using CALMAC's Ice ...

Customers trust CALMAC for the best ice skating surfaces under any conditions -- and lower construction and operating costs. Widely recognized for promoting peak energy conservation and energy cost savings, CALMAC Corp is a member of the Ice Skating Institute, U.S. Green Building Council (USGBC) and the New Buildings Institute. PR Contact

Thermal energy storage is like an "HVAC battery" for a building's air-conditioning system. Trane Thermal Energy Storage systems use standard cooling equipment, plus an energy storage tank to shift all or a portion of a building's cooling needs to off-peak, night time hours. Model C energy storage tanks store energy in the form of ice during off-peak periods when utilities generate ...

glycol solution circulates through the chiller and the Ice Bank's heat exchanger, bypassing the air handler coil. (See Figure 2). The fluid temperature is about 25 F (-3.9 C) and the water surrounding the heat exchanger freezes. During the day, the glycol solution is cooled by the Ice Bank's tank from approximately 52°F to 34°F (11°C to 1°C).

IceMat I. In order to meet a customer's needs, CALMAC offers two different types of IceMat systems, IceMat I and II. Both IceMats minimize the time and labor out of rink set-up, create uniform ice temperatures in varied weather conditions and are easily portable.. ICEMAT I. Handmade in our New Jersey factory

Unlike other ice mat systems, CALMAC offers a factory-installed main header design option, which reduces time and labor. IceMat also provides greater heat-exchange surface area than conventional indirect or direct refrigeration piping systems, allowing IceMat to make good quality ice even when air temperatures reach over 90°F.

or CALMAC's Applications Engineering Department at (201) 797-1511 or e-mail [info@caltmac](mailto:info@caltmac) . 1. GENERAL a. Module Description. The storage module consists of a plastic tank full of water (ice in the charged state) in which a specially designed heat exchanger is immersed. The heat exchanger consists of a coiled mat of

Clear. CALMAC's IceMat ice rinks have been installed in thousands of rinks around the world including the Rink at Rockefeller Center, the Pond at Bryant Park, Washington Harbour, Winter Classic "IceBowl", Ice at Santa Monica, Barton Coliseum Curling Rink, LA Live, Ice at Mission Valley, Ice Rink at Westfield Valencia Town Center, Fifth Third field "Winterfest" and more.
