

Who is Myanmar Solar power trading?

Myanmar Solar Power Trading Co.,Ltd is established in 2011 and we are one of the leading full-service providers for C & I projects, residential, industrial and large scale solar projects in Myanmar. From a single point of contact, we provide solar PV designs, calculations, consultations, installations and repair and maintenance services as well.

Does Myanmar utilize solar energy?

Myanmar has high solar irradiation levels in many areas, but no large-scale solar systems have been installed due to the largely mountainous terrain, protected areas, and limited grid system, which weakens the energy potential from this source.

Will Myanmar adopt solar power systems in its buildings?

We expect that more commercial and industrial clients in Myanmar will adopt Solar Power systems in their buildings in the near future, and it is exciting to witness the country moving towards greener technology.

Are solar cells used in Myanmar?

Myanmar, being a country with abundant sunshine, has the potential for solar energy. However, the high cost of solar energy limits its availability for some. Researchers have been conducting research on solar cells in Myanmar to address this issue.

Is Myanmar a good place to invest in solar power?

According to a study on solar resources and solar PV potential in Myanmar conducted by the World Bank, most of the population (75%-85%) lives within a 25-50 km radius of HV power lines, making it a promising location for medium- and large-scale solar projects. In 2017, peak demand reached ~3000 MW.

Where is Myanmar's first solar power plant located?

Myanmar's first solar power plant is located in Minbu, Magway Division. The plant produced 40 megawatts (MW) of electricity in its first phase of operations and will produce 170 MW once fully operational.
