

ENGIE EPS brings its technological expertise to the project "Lifou 100% Renewable Energy by 2020" aimed at transforming the New Caledonian island into a global model for green energy. ...

French renewables developer Akuo has won a tender to build a large-scale battery storage system in New Caledonia, a French overseas territory in the southwestern Pacific Ocean. The giant battery is expected to be the ...

French renewables developer Akuo has won a tender to build a large-scale battery storage system in New Caledonia, a French overseas territory in the southwestern Pacific Ocean. The giant battery is expected to be the largest storage facility in the region and also in France, with a planned storage capacity of 200 MWh.

The French overseas territory of New Caledonia has hailed the switch-on of a 16MWp solar farm, with battery energy storage to be later attached, and another standalone 5MWh battery project as significant steps towards "100% renewable energy" targets.

Akuo plans to deploy 200 MWh of battery storage in New Caledonia, supplying 50 MW for three hours per day over 12 years. The facility will primarily support the operation of nickel mines.

Akuo, an independent global renewable energy power producer and developer, has been chosen by the New Caledonian Government to construct and operate an electricity storage facility capable of delivering 50 MW for 3 hours every day throughout its life cycle (12 years). To do this, Akuo is planning to install over 200 MWh of storage capacity.

The government of New Caledonia, a French overseas territory in Polynesia, has announced plans for a 150MWh battery energy storage system (BESS) to be deployed by IPP Akuo Energy. Authorities have enlisted Akuo, a ...

The New Caledonian Government has chosen Akuo, a prominent global independent renewable energy producer and developer, to oversee the construction and operation of a groundbreaking electricity storage facility.

November 2019 - ENGIE EPS announces ...

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

The government of New Caledonia, a French overseas territory in Polynesia, has given the green light to the construction of a 50-MW/150-MWh battery energy storage system (BESS) by domestic renewable power producer and developer Akuo.
