

How much does solar power cost in New Zealand?

According to the Electricity Authority, the average size of a residential solar power system installed in New Zealand today is 4.4 kW, which would cost roughly \$12,600*fully installed. A 4.4 kW solar power system would include 10 or 11 solar panels (depending on the size of the panels) and a 4 kW or 5 kW inverter. Is Solar Power Worth It?

Are solar panels a good investment in New Zealand?

A solar power system in New Zealand can easily earn a 10 to 15% return on investment. But this rate of return is likely to increase each year as the price of electricity continues to climb. Unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback?

Can you install off grid solar in New Zealand?

In New Zealand you can install your own off grid solar up until the point of 240V AC wiring- such as wiring into a household switchboard - which by law can only be done by an electrician. We make installation easy with off grid solar kits in various sizes to fit your lifestyle. Not sure which off grid solar power system is best for your lifestyle?
