#### How much energy does Nicaragua use?

According to the International Energy Agency, Nicaragua supplies around 60% of its total energy from renewable sources, including wind, solar and geothermal, with biomass - an often contested renewable - accounting for the largest share, at roughly 40% of total supply.

#### What is Nicaragua's energy supply?

"This gives us a guarantee that the project will be carried out in the best way and will ensure its best performance." Around 60% of Nicaragua's total energy supply is drawn from renewable sources, with biomass (41.8%) accounting for the largest share of generation as of 2022. The remaining 40% is supplied by oil imports.

#### Does Nicaragua have geothermal power?

The Maribios Range is part of the Pacific "Ring of Fire" and contains several active volcanoes. The government estimates Nicaragua's geothermal potential to be 2,000 megawatts. Nicaragua's National Electric Transmission Company (Enatrel) seeks to transform the country's energy mix by focusing on renewable energy with its 2022-2037 expansion plan.

#### Are NGOs involved in rural energy issues in Nicaragua?

NumerousNGOs are involved in rural energy concerns in Nicaragua. In early 2020, Nicaragua began to plan for the creation of four state companies (Enigas, Eniplanh, Enicom, and Enih) to coordinate the importation, storage, distribution, and sales of oil and gas in Nicaragua.

#### Why does Nicaragua lose so much energy?

Local NGOs report that nearly 20% of Nicaragua's energy is lost due to poor connections and obsolete systems, while many informal connections drive up distribution costs. Furthermore, distributors pay the highest energy prices in Central America, an expense that is ultimately passed on to consumers.

#### How many solar panels will the San Isidro plant have?

According to the government, the San Isidro plant will comprise 112,000 solar panels. On the condition of anonymity, sources tell Dialogue Earth that a similar area of land will be used for the El Hato plant.
