

Which energy sources are used in North Macedonia?

At the moment, most of the electricity in North Macedonia is produced from thermal power plants with coal as the primary energy source. The share of the renewable energy sources in the total installed capacity in North Macedonia is 38%, with most of the renewable energy coming from large hydro powerplants.

Does North Macedonia need electricity?

Although North Macedonia's renewable energy potential is huge (especially solar), the country is still dependent on importing electricity—imported electricity constitutes around 30% of the overall gross consumption.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

How much solar power does North Macedonia have?

How many energy licenses will Macedonia have in 2023?

Additionally, the Macedonian Regulatory Commission for Energy ("RKE") has already announced that it issued 278 licenses for only six months in 2023, which is more than in the whole 2022. If all the issued energy licenses result in operational power plants, that would amount to 270 MW of newly installed capacity.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.

Since the adoption of the new Energy Law in 2018, a day-ahead energy market has been expected to be implemented in North Macedonia. On 10 May 2023, the Macedonian National Electricity Market Operator ("MEMO") rolled-out and ...

North Macedonia: Many of us want an overview of how much energy our country consumes, where it comes

from, and if we're making progress on decarbonizing our energy mix. ... To reduce CO₂ emissions and exposure to local air pollution, we want to transition our energy systems away from fossil fuels towards low-carbon sources.

The beginnings of football in North Macedonia date back to the early 20th century in the then Ottoman Empire, with the first recorded match taking place in Skopje in April 1909. At that place was erected a monument in the form of soccer ball weighing about 250 pounds, because it was the first official soccer match played on the territory of North Macedonia.

However, serious challenges to doing business in North Macedonia remain, including the country's opaque tendering process, weak judicial system, and significant levels of corruption. According to import regulations, all medical equipment entering North Macedonia is exempt from import duties, but subject to an 18% value added tax (VAT).
