The project is scheduled to be delivered in late 2016. Wärtsilä will supply an extension to the Pockwood Pond Power Generating Station in the British Virgin Islands, owned by the British Islands Electricity Corp.. The extension consists of two Wärtsilä 9L46 gensets, the related auxiliaries and a new power house, delivered on a turn-key basis.

Visit our website at to see videos and examples of installations, including the British Virgin Islands. The average power consumption in the Grenada is only 7,500 kWhrs per year, but many clients will require a system to cover larger consumption during the seasons of high tourist demand.

By Dan Fink - Anyone who owns a vehicle likely already has a love-hate relationship with the starting battery inside 's heavy, dirty, expensive, dangerous, and always seems to fail at the most inopportune times. In an off-the-grid home, those irritating issues are compounded exponentially. A typical off-grid battery bank that needs to power a modest-sized, ...
