

How does the power sector work in Cameroon?

The power sector in Cameroon operates a highly centralized governance structure, at the top of which is the Ministry of Energy (Njoh et al., 2019), led by a minister. Even though the ministry has regional and divisional offices all over the country, all major decisions on the power sector are taken in Yaounde, the country's capital.

What does Power Africa do for Cameroon?

Power Africa Coordinator Mark Carrato added: "Over the past two years, Power Africa has worked closely with Cameroon's Ministry of Water Resources and Energy and Cameroon's energy regulatory agency, ARSEL, to streamline minigrid licensing procedures and increase private sector participation in the country's blossoming minigrid sector.

Is wind energy sustainable in Cameroon?

From the government Master Plan, wind energy is considered "unfavorable". However, this study assumes the advances in wind technology and increase in the LCOE have rendered this technology sustainable in Cameroon's generation system.

Who generates electricity in Cameroon?

Presently, Electricity is generated by independent power producers (IPPs) and Energy of Cameroon (ENEO) (the latter also doubling as the sole distributor), to consumers over a transmission network managed by National Electricity Transmission Company (SONATREL).

Will US companies help Cameroon meet its energy needs?

The study will also include the design and monitoring of a minigrid pilot project. U.S. Charge d'Affaires in Cameroon, Vernelle Trim FitzPatrick, said: "We are proud that American companies will be part of developing new solutions to meet Cameroon's energy needs.

What is the main source of energy in Cameroon?

3.1. Cameroon energy supply/consumption The primary supply of energy in Cameroon comes from biofuels and waste (70.58%), followed by crude oil (20.17%), natural gas (5.34%), hydropower (3.90%), and other renewable sources (0.01%) like solar, geothermal, and wind.
