

What is Panama's Plan Energético Nacional?

The PEN(Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

Will 70% of Panama's energy supply be renewable after 35 years?

También disponible en Español. Panama's National Energy Plan 2015-2050 suggests that 70% of the country's energy supply could be renewable after 35 years. The plan was adopted as a long-term roadmap to diversify the energy sector and advance energy access, energy efficiency, energy security and overall decarbonisation of the energy system.

What are the energy-intensive industries in Panama?

Energy-intensive industries in Panama include food, tobacco, cement and paper production. Based on SNE (2015), Plan Energético Nacional (2015-2050). 4. COMMERCIAL AND PUBLIC SECTOR: The commercial and public sector is the largest consumer of electricity among the four sectors. Consumption reached 2 816 kboe in 2014 (Figure 5).

How much electricity does Panama need?

At the same time, electricity demand in the country has continued to increase, reaching a peak demand of over 1 600 megawatts (MW) in 2015. To meet this growth, Panama introduced wind and solar photovoltaic (PV) energy in 2013, which reached 270 MW and 90 MW of installed capacity by 2016, respectively.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.

According to a UNEP report, replacing this fuel with renewable energy could create over 93,000 jobs in Panama by 2050, or 133,000 if part of the technology was built locally. If Panama switched to entirely renewable energy, carbon dioxide emissions could fall by 91 per cent by 2050, also reducing Panama's energy costs by US\$22 billion.
