

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

Does Bulgaria benefit from solar power subsidies?

In the last two years, the combined nameplate size of solar power installations in Bulgaria has doubled to more than 2.4 GW and additions peaked this summer. Moreover, in the current top 20, no photovoltaic units built since 2021 benefit from any subsidies, data compiled by Capital.bg showed.

What will Bulgaria's new solar power plant do?

With a nominal output of 124 megawatts peak (MWp), the Verila solar power plant will make a significant contribution to Bulgaria's green electricity mix from spring 2023 onwards. Built by SUNOTEC, the new solar park will generate energy equivalent to 12 percent of the current total output of all PV plants in the country.

Why should you choose global solar Bulgaria?

Our goal is to offer innovative products and services at the best price, which are part of the economic and ecological context of renewable energies. Sustainable development is the belief that underlies Global Solar Bulgaria's initiatives to protect the environment, strengthen communities and stimulate responsible growth.

Are solar panels a viable option for self-consumption in Bulgaria?

Conversely, households and institutions interested in installing solar panels for self-consumption are still stuck with administrative hurdles. In the statistics of the International Renewable Energy Agency (IRENA), Bulgaria had 1.28 GW at the end of 2021 and 1.95 GW just one year later. The measure is expressed in nominal or peak capacity.

This new solar panel production line in Bulgaria is a benchmark for technological innovation and sustainability. Featuring advanced automation, it minimizes manpower while maximizing precision and efficiency. The production line is designed for high-efficiency solar panels, supporting both PERC, PERT, and TOPCon technologies. By using ...

We specialize in the construction of photovoltaic systems for business, home and solar power plants. We provide reliable and cost-effective solutions for the use of renewable energy for the ...

The construction of Bulgaria's largest solar power plant is due to be completed by spring 2023. The new power plant, south of Sofia will generate green electricity with a capacity of 124 megawatts peak. The Verila ...

Bulgarian solar panel installers - showing companies in Bulgaria that undertake solar panel installation, including rooftop and standalone solar systems. 87 installers based in Bulgaria are listed below.

The construction of Bulgaria's largest solar power plant is due to be completed by spring 2023. The new power plant, south of Sofia will generate green electricity with a capacity of 124 megawatts peak. The Verila project is being delivered by SUNOTEC, the European market leader in the construction of solar parks.

726,181 units of latest-generation solar panels were installed in the solar fields. The realization of these investments has placed SUNTERRA in a leading position in Bulgaria and among the ...

726,181 units of latest-generation solar panels were installed in the solar fields. The realization of these investments has placed SUNTERRA in a leading position in Bulgaria and among the largest projects in Europe. The two solar plants provide clean energy for over 167,000 households and save 622,000 tons of carbon emissions annually.

We specialize in the construction of photovoltaic systems for business, home and solar power plants. We provide reliable and cost-effective solutions for the use of renewable energy for the needs of our customers in Bulgaria and the European Union. We are your trusted partner for turnkey solar systems projects at all sizes.

Installation of photovoltaic systems can be performed on a slope or flat roof, complete roofing, facade installation or solar park. Crucial to the power of a solar installation is the optimal south facing unshaded roof at an angle of slope for installation of 25 to 35 degrees.
