

Parking lot with solar panels St Vincent and Grenadines

Our smart solar solution is the number one home and business improvement project that pays for itself within 3-5 years, saves you money, increases the value of your property and is environmentally friendly. We help clients save thousands of dollars with our payment plans of little to no upfront cost, hassle free.

A photovoltaic system will be added to the generation mix on Union Island in keeping with a mandate by the Government of St Vincent and the Grenadines (SVG) and St Vincent Electricity Services Limited (VINLEC) to increase the penetration of renewable energy in the production of electricity.

The battery storage system will help Mustique to increase the contribution of solar energy on the island and to reduce its carbon footprint. Mustique has the goal to increase renewable share to over 75% by 2024 and reduce the ...

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the ...

Our smart solar solution is the number one home and business improvement project that pays for itself within 3-5 years, saves you money, increases the value of your property and is environmentally friendly. We help clients save ...

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on Monday 25th March 2019 has been hailed as a significant milestone in the energy sector of Saint Vincent and the Grenadines.

The Mayreau hybrid generation project is expected to have a significant impact on electricity generation on the island. On site, there are 313 solar panels that will produce conservatively 164,049 kWh(units) of electric ...

On Thursday, December 10 the Bank's Board of Directors approved financing of US\$8.6 million to St. Vincent Electricity Services Ltd (VINLEC) for the supply and installation of solar photovoltaic (PV) systems at buildings owned by VINLEC in the vicinity of the Argyle International Airport.

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the vicinity of the Argyle International Airport.

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on March 25th, 2019 has been hailed as a significant milestone in the energy sector of St. Vincent and the Grenadines. Officials and

stakeholders involved in the local energy sector have said this project is a game changer which is expected to bring numerous ...

The Mayreau hybrid generation project is expected to have a significant impact on electricity generation on the island. On site, there are 313 solar panels that will produce conservatively 164,049 kWh(units) of electric energy per year which equates to a 28% renewable energy penetration on the island's grid based on recent demands.

The project sets a strong precedent for using renewable energy to drive down energy costs on the outer islands. Located on Union Island, the 600kW solar PV plant is connected to a 637 kilowatt-hour (kWh) lithium-ion battery, extending its generating capacity to supply all of Union Island's daytime power requirements.

A photovoltaic system will be added to the generation mix on Union Island in keeping with a mandate by the Government of St Vincent and the Grenadines (SVG) and St Vincent Electricity Services Limited (VINLEC) to ...

The battery storage system will help Mustique to increase the contribution of solar energy on the island and to reduce its carbon footprint. Mustique has the goal to increase renewable share to over 75% by 2024 and reduce the emissions by 22% by 2025, in line with St. Vincent & The Grenadines' commitment to the Paris Climate Agreement.
