

# Patent application for underwater energy storage system

An offshore floating wind farm producing compressed air in varying quantities depending on the wind speed, the compressed air being delivered to a large-volume, thin-walled, underwater ...

Underwater compressed air energy storage was developed from its terrestrial counterpart. It has also evolved to underwater compressed natural gas and hydrogen energy storage in recent years. UWCGES is a promising ...

Abstract: Buoyancy battery underwater energy storage is an emerging area of research relating to the storage of energy ... past patent application [17] reported system roundtrip efficiency of ...
