

Pele Green Energy has won 2.5 billion rand (\$132 million) in funding from lenders including Nedbank Group Ltd. to help it build renewable power plants including one ordered by Anglo American Platinum Ltd.

Since 2009, we have grown our asset base to include a diverse portfolio of technologies and approaches. Our portfolio exceeds 2GW of clean energy, comprising of wind and solar utility-scale projects as well as battery storage. We feed the national grid and are also a supplier to private energy-intensive users.

Pele Energy Group was founded by five young Africans whose sole emphasis and focus at the time in 2009 centred around youth regeneration and development. As black South Africans born in the 1980's, we were clearly mindful and aware of the relative privilege in our own personal lives and upbringing in comparison to the majority of young black ...

Nedbank Group and Absa Group provide debt financing for the ZAR 2.1 billion project, with Pele Green providing equity. The Sonvanger solar park will help reduce carbon emissions and boost renewable energy in South Africa's power mix. Pele Green Energy has secured financial close on a 100-MW solar project. The project will power Glencore's ...
