

WASHINGTON - United States Trade Representative Katherine Tai today announced that the United States has requested dispute settlement consultations with Mexico under the United States-Mexico-Canada Agreement (USMCA). The consultations relate to certain measures by Mexico that undermine American companies and U.S.-produced energy in favor ...

Highlights from the 2024 Report. In 2023, jobs in clean energy grew at more than twice the rate of the strong overall U.S. labor market thanks in large part to the Biden-Harris Investing in America agenda driving record investments in clean energy supply chains. Clean energy jobs grew at more than double the rate (4.9%) of job growth in the rest of the economy (2.0%), adding 149,000 ...

America's prosperity, which underwrites its national security, depends on maintaining a fair, open, and stable international economy that assures reliable access to affordable energy for the United States, its allies, and well-governed trading partners. Internationally, a lack of access to energy access can foster conditions for political instability, ...

An official website of the United States government. Here's how you know. Here's how you know. ... As More Americans Seek Home Energy Upgrades, New DOE Resources Will Enable Easier Access to the Historic Money Saving Incentives Provided by the Biden-Harris Administration's Investing in America Agenda ...

On January 9, United States Secretary of Energy Jennifer M. Granholm and Minister of Economy, Trade and Industry of Japan NISHIMURA Yasutoshi met in Washington D.C. to discuss the situation surrounding global energy security, strengthening clean energy cooperation, and the importance of clean energy transitions, including renewable energies, energy efficiency, ...

Pess Energy, specialist in mobile energy solutions, has developed a new electric generator, the Rock-E, specially designed for construction needs. With its 7.2 kVA output and 10 kWh capacity, it offers a modular solution, as several units can be coupled together to replace thermal generators from 3KVA to 40KVA.

We have already permitted in the United States, the Department of Energy and the Federal Energy Regulatory Commission, a very large amount of liquified natural gas terminals which have not - many of which - most of which have not even begun construction. There are some - there's two facilities that are in construction right now; one of ...

We are committed to helping you reduce your carbon footprint by making clean energy solutions available to everyone, everywhere. Our lightweight, robust solar-powered generators help to create a comfortable working environment, freeing you from all constraints.

Another is the work that we continue to do with officials in Baghdad, with officials in Ankara, and with the KRG on the reopening of the ITP pipeline, which is an energy asset that the United States very much wishes to see brought back online because of the critical role that that provides in helping to sustain the energy economy of the KRG ...

This report shows how advanced geothermal technology could increase the United States' geothermal energy production to 90 gigawatts or more by 2050, a twentyfold increase. This growth in geothermal energy supports the Biden-Harris Administration's goals of facilitating a carbon-free electricity grid by 2035, while creating thousands of good ...

PESS Energy designs, manufactures and sells, zero-emission generators. Our mission is to reduce the carbon footprint of our customers' activities and give them renewable energy autonomy. Our innovative solutions (with li-Ion batteries and solar recharging) are the ecological alternative to noisy, polluting gasoline generators.

What would it take to decarbonize the electric grid by 2035? A new report by the National Renewable Energy Laboratory (NREL) examines the types of clean energy technologies and the scale and pace of deployment ...

"There is enormous untapped potential for geothermal energy in the United States," said U.S. Secretary of Energy Rick Perry. "Making geothermal more affordable can increase our energy options for a more diverse electricity ...
