

Who installs roof top solar photovoltaic PV systems in the Seychelles?

Since 2012, ESS has been installing rooftop solar photovoltaic PV systems in the Seychelles. Therefore, we have experience with grid-tied roof top solar PV system. Also we are an approved installer by the Seychelles Energy Commission and Public Utility Corporation.

Why choose Seychelles solar energy?

Local Seychelles experience Mahe, Praslin, La Digue and outer islands Certified by Seychelles Energy Commission Approved by PUC Technical staff qualified in solar energy & energy efficiency Quality renewable energy products Warranty & Certification Best price Optimal performance Best return on investment Solar Energy PV Systems

How does solar PV work in the Seychelles?

Currently, Seychelles has a net metering policy where electricity produced by your solar photovoltaic PV systems is recorded to a separate meter. PUC then credits your electricity bill at the end of each month. Further details on how solar PV works in the Seychelles please see our Frequently Asked Questions page.

Who is energy solutions Seychelles?

Welcome to Energy Solutions Seychelles - Leading solar energy company in the Seychelles. We supply and install high quality solar energy systems and solar hot water products in the Seychelles. Our aim is to provide reliable technologies including photovoltaic panels and dependable installation service. Why Choose Us Most experienced

Who is ESS Seychelles?

Contact Us ESS has been installing photovoltaic (PV) systems in Seychelles since 2012 and provides renewable energy products and energy efficiency consultancy. About Us FAQ About PV Products

How does a hybrid system work in Seychelles?

A hybrid system uses both the grid and batteries. Currently, Seychelles has a net metering policy where electricity produced by your solar photovoltaic PV systems is recorded to a separate meter. PUC then credits your electricity bill at the end of each month.

However in Seychelles, domestic users pay a lower unit cost than commercial users such that the investment return for commercial users is much better than for domestic users. For example a domestic user consuming 200 units per month will pay approximately R224 plus a fixed demand charge which together will amount to R264.

Photovoltaic ceramics are set to revolutionize the way we harness solar energy, combining the durability of ceramics with the energy-converting power of photovoltaics. This innovative technology offers exciting ...

The use of solar photovoltaic (PV) systems is gaining increasing popularity in Seychelles. Small to medium sized consumers are installing grid-tied photovoltaic systems on their roofs. The tariff arrangement adopted is one set on net tariff where the energy produced by a customer offsets the energy consumed, leading to price reduction in ...
