

How can a market-centric business model help solar PV companies?

The disruptive nature of solar PV technology, limited awareness and high financial requirements often make solar PV disadvantaged compared with its competition. A market-centric business model can help solar PV companies address consumers' concerns while offering solutions to enhance its adoption.

How do community business models affect distributed solar PV?

Huijben and Verbong identified that business models providing different ownership structures facilitated the development and growth of distributed solar PV. Amus suggested that adopting a community business model addressed infrastructural hindrances, making it cost-efficient for consumers to utilise solar PV.

Should solar PV companies use social media?

Digital and social media platforms offer an excellent opportunity for solar PV companies to increase their market reach without excessive financial burden. Social media is increasingly used to market products and could serve as an ideal medium for solar PV companies.

What is State Key Laboratory of Photovoltaic Science & Technology?

The "State Key Laboratory of Photovoltaic Science and Technology" established at Trina Solar, is one of the first national key PV laboratories in China that was recognized by Ministry of Science and Technology.

How can a company promote solar PV technology?

A company's ability to devise and deliver value offerings that match customers' needs is vital in encouraging the adoption of solar PV technology. The extent to which a company can address market needs and deliver value often depends on the business model it has adopted.

How do solar photovoltaic companies influence consumer adoption?

Solar Photovoltaic (PV) companies, directly involved in interaction with consumers, dissemination and sales, become an important actor in this regard. Companies' ability to devise and deliver value offerings that match customer needs can play a vital role in encouraging adoption.

With the Government giving less to art and education, somebody's got to give more. And that somebody is America's corporations. footnote 1 Such statements were a common feature of ...

This paper investigates the role of "social spillovers" - people learning from and imitating the behaviour of other people - in the adoption of new technologies, namely solar PV ...

The main reason is that the innovation scale efficacy of photovoltaic enterprises is low; (ii) Chinese PV
